GLOBE-WERNICKE SALUTES THE UNIVERSITY OF
COLORADO

BOULDER, COLORADO

The University of Colorado Library was the first American University Library to operate on a full subject divisional plan and on a full open-shelf basis. These innovations, plus a continuing program of expansion and modernization, make it one of the most efficiently operated libraries in the country.

Globe-Wernicke time-motion engineered book stack equipment was an important consideration in the design and construction of recent additions to this library system.

If you are considering a new library or modernizing your existing one, consult Globe-Wernicke's free Library Planning Staff for personal service. Write today for complete information, Dept. S-7.
